anujkek04@gmail.com | +91 6266209160 | github.com/anuj-k-bit | linkedin.com/in/anuj-kek04

PROFESSIONAL SUMMARY

Detail-oriented Computer Science undergraduate with hands-on experience in data analysis, research, and reporting through full-stack and security-focused projects. Skilled at translating data into actionable insights, collaborating across cross-functional teams, and quickly learning new tools and technologies. Strong analytical and problem-solving foundation backed by 100+ LeetCode solutions and certifications in cybersecurity and cloud platforms. Eager to support day-to-day team initiatives and contribute fresh ideas as an intern at Honeywell.

EDUCATION

B.Tech in Computer Science and Engineering

Vellore Institute of Technology, Bhopal | CGPA: 8.16 / 10.0

Sep 2023 – Expected May 2027

TECHNICAL SKILLS

- **Languages & Data:** C++, Python, JavaScript, Java, SQL, TypeScript, Pandas, NumPy, Scikit-Learn, Data Analysis & Reporting
- **Frontend & Backend:** React.js, Vanilla JS (ES Modules), Vite, REST APIs, HTML5/CSS3, Supabase (Postgres, Auth, Realtime), JSON
- **Tools & Research:** Git/GitHub, Linux, VS Code, Wireshark, Splunk (SIEM), MATLAB, Excel-based reporting
- **Core CS:** Data Structures & Algorithms, OOP, DBMS, Computer Networks, System Design

PROJECTS

CollabSheet – Real-Time Collaborative Spreadsheet | collab-sheet-alpha.vercel.app

Mar 2026

- Built a real-time collaborative spreadsheet using vanilla JavaScript (ES modules) and Vite, powered by Supabase for Postgres, Auth, Realtime, and Presence.
- Implemented Row-Level Security at the database layer to enforce collaborator roles (viewer, editor, owner) and Google/Anonymous authentication for flexible sign-in.
- Engineered live cursor tracking and presence broadcasts so collaborators see each other's edits and active cells update instantly without page refresh.
- Implemented a formula engine (SUM, cell references, arithmetic expressions) on a 50x26 grid with keyboard navigation, collaborator sharing, and CSV export.

IPL Win Predictor Dashboard | ipl-predictor-kxnj.vercel.app

Jun 2026

- Built a full-stack analytics dashboard that predicts IPL match win probabilities using a Scikit-Learn logistic regression model trained on historical ball-by-ball match data.
- Designed a live predictor that recalculates win probabilities in real time from score, overs, and wicket inputs, alongside venue, head-to-head, and player-impact statistics panels for data-driven analysis.
- Built with React, TypeScript, and Recharts on the frontend and a Flask/Pandas/NumPy backend for data processing and model serving.

CERTIFICATIONS

- Google IT Support Certificate – Google (Jan 2026)
- Google Cybersecurity Professional Certificate – Coursera (Dec 2025)
- Oracle Cloud Infrastructure 2025 Certified Observability Professional – Oracle (Oct 2025)
- Deloitte Cyber Job Simulation – Forage (Jul 2025)
- IBM Cybersecurity Fundamentals – IBM (Jun 2025)

LEADERSHIP & EXTRACURRICULAR

- Coordinated technical workshops on blockchain and Linux administration for 200+ students as a member of VIT Bhopal's Blockchain and Linux Clubs, collaborating with peers and contributing ideas in team meetings.
- Solved 100+ algorithmic problems on LeetCode, strengthening analytical and structured problem-solving skills.
